

## Forest Watch Picture Release Form

The *Forest Watch* program is an educational outreach program that collaborates with teachers, students and University of New Hampshire (UNH) scientists. UNH works with New England teachers to assess the health of white pine. The activities your son or daughter participates in helps UNH scientists to conduct research. Often photos are taken while students are participating in these activities. It is UNH's goal to educate others about the program and also encourage others to join the program. This is done through posters, brochures, written proposals and second-party publications (i.e., magazines, newspapers). Pictures speak a thousand words and are very effective in promoting the types of activities students are involved in, as well as inform the general public about the type of research activities school students participate in. We ask for permission to be able to use photographs that may contain your child while participating in *Forest Watch* activities.

I \_\_\_\_\_ parent of \_\_\_\_\_ give *Forest Watch* or others designated by *Forest Watch* permission to use my child's photograph for educational and informative purposes.

Parent's Name (please print): \_\_\_\_\_

Parent's Signature: \_\_\_\_\_

Student's Name: \_\_\_\_\_

Today's Date: \_\_\_\_\_
